

PLC SCALE INDICATOR

- * **Graphical Display**
- * **Multiple Display Options**
- * **Accurate Measurement**
- * **Inventory Management**
- * **Alarm and Event Historian**
- * **PC Compatible**

Sortrite PLC-Software

- * PC Interface Software
- * Live Onscreen Data
- * Live Weight Logs
- * Multiple Reports
- * Ethernet or Serial
- * Forecasting on Screen
- * Multiple Charts
- * Live Statistical Data

Examples of Reports that can be generated from **Sortrite**

- * **Nylon Bushings** - at all wear points for long lasting service.
- * **2 or 3 Pen Destination** - 2 pen destination is used sort to food court or to market pen. 3 pen destination is used in sorting to select high or low protein food courts and market pen. 2 or 3 pen destination is excellent for sorting in alleys of conventional barns. Sorting this weeks shipment and next weeks shipment reduces animal stress and the labour costs of weighing.
- * **Wheel Option** - for easy movement within your facility.
- * **EID Capability** - tag reading to identify each animal. Ideal for gilt or barrow grow operations.
- * **Double Gate Option** - on entry end, prevents animals in the alley from interfering with the animal being weighed. Also Gen II is the only scale on the market with a completely live weighing platform
- * **Target Sort** - using fluorescence paint, animals can be selected from the large group and sorted automatically to a holding pen. This is great for visually selecting gilts for next day shipment
- * **Remote Control** - NEW FOR 2009!! 3 Button remote control to open and close entrance and exit gates from up to 20' away. Great for when user is doing a forced on controlled sort in an alley way or sorting pen.
- * **Locking Gates** - prevents animal walk through.

GEN II FEATURES

- * **2 Level Alarm System** - if an alarm condition develops after a preset amount of time the gates will open to food court and will trigger digital output "A". If the alarm condition is not cleared the gates will remain open keeping a pathway to the food court and will trigger digital output "B". If the alarm condition clears the scale will reset and is ready for the next animal. All of the times are adjustable to suit your production facility.
- * **Identifies 5 Weight Ranges** - included are 3 dye spray categories. All weight ranges are adjustable.
- * **Easy Exit Air** - a small air blast after the exit gate is open to encourage the animal to exit scale with adjustable time settings.
- * **Maximum Sort Feature** - adjust to the size of your market pen and the scale will stop sorting once it finds the pre-set amount. Number of animals remaining from original number is also displayed on screen.
- * **P.C. Compatible** - remote monitoring and configuration with "Sortrite" software.
- * **Fail Safe System Default** - defaults the scale to the food court under any alarm condition. Examples; animal asleep in scale, electrical failure, compressed air failure. Gates open, entry and exit gate and sorting gate defaults to open path to food court. This is a very unique feature and only available on Gen II.

Testimonials:

Ontario - Schothorst Farms - Hank

Schothorst: Hank purchased **8 Gen II** 2-way scales from Dwyer Manufacturing & John Ernewein Ltd. for his 4,800 hog operation. Hank explains, "We have 8 **Gen II** scales, our hogs are on dry feed sorting into the food court, I am very impressed with **Gen II** and with the dealer support we have received."

Saskatchewan - Sunnydale Colony - Johnny & Ben Wurz:

Johnny and Ben purchased **12 Gen II** scales from Betker Livestock for their 10,000 feeder hog operation. Johnny says "We are more than pleased with the performance & accuracy of the **Gen II** scale, dealer and factory support has been outstanding."

Quebec - Dominique Turcôt director of Pork Production at Mario Coté Inc.:

Mario Coté Inc. started with the purchase of **2 Gen II** 2-way scales and now have **38**. Dominique says, "Gen II is an excellent tool to separate off lighter pigs when first introduced to the large pen. This enables them access to higher protein feed. I'm very happy with the machine, and with the support of the manufacturer and our dealer Agri-Ventes Brome Ltee."

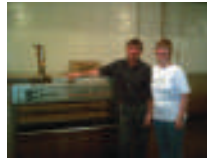

Alberta - Great Plains Medicine Hat - Dave Tyndall:

Great Plains purchased **6 Gen II** scales for their operation of 6,000 hogs. Dave explains, "We are a managed sort operation, with the **Gen II** scale we are able to weigh 180 head per hour, and our shipments are 97% in our target range. We have received great personalized support from Elite Swine and the factory."

Manitoba - Ferme Poiron Ltee. - Jean and Jeanne Poiron:

Jean and Jeanne have purchased **12 Gen II** scales from Penner Farm Service for their operation of about 7,300 hogs. Jean says, "I make extensive use of the 2 color paint system. It allows us to monitor problem pigs."
